EXPERIENCE

AGL360 – Hakuhodo International Quality Engineer

June 2024-Present

- **Developed and executed comprehensive test plans and strategies** for upcoming sprints, **resulting in an 80% reduction in post-release bugs** through manual testing, significantly enhancing **product quality** and **customer satisfaction**.
- **Streamlined test case execution and processes**, increasing **testing efficiency by 72%**, resulting in **faster release cycles**. Conducted diverse manual testing types including **Functional, Usability, Regression, Integration, Exploratory, and Security Testing** to ensure comprehensive coverage.
- **Leveraged expertise in e-commerce platforms (Zepto, Instamart, Amazon, Flipkart, Blinkit, Myntra)**, utilizing **JIRA** and **Bugzilla** for efficient bug reporting and test management via **Excel** and **Testrail**. Conducted **SQL-based database testing** and **API testing with Postman**, ensuring seamless integrations and functionality.
- **Boosted team collaboration by 40%** through **Agile methodologies**, while applying a solid understanding of **SDLC** and **web technologies (HTML, CSS, JavaScript)** to drive effective **test documentation and reporting** for faster, more efficient project completion.

Project-(E-Genie) – A dashboard for Flipkart, Amazon, Zepto, Blinkit, and Bajaj Ads Platform, where users can access all campaign metrics and optimize campaigns to achieve higher ROI. The dashboard also provides real-time data, including day-wise campaign performance, demographic, and geographic information.

Mphasis Ltd. Quality Analyst

April 2023 –May 2024

- **Developed and executed comprehensive test cases** based on detailed requirements and user stories, covering functional, regression, exploratory, and cross-browser testing. Actively participated in sprint meetings, collaborating with clients and developers to ensure alignment and achieve a **40% increase in sprint efficiency** and faster issue resolution.
- **Streamlined bug tracking and test case management** using Jira and TCMS, improving defect detection and reporting accuracy. Contributed to a **60% improvement in overall product quality** by identifying critical defects early, minimizing post-release issues, and enhancing the development process.
- **Performed data validation tasks** using Excel and databases, ensuring data integrity across platforms, and conducted thorough API testing with Postman to ensure seamless system integrations and functional correctness. This led to a **30% reduction in integration-related issues** during testing phases.
- **Implemented STLC methodologies** across all testing phases, from requirement analysis to defect management, ensuring a **25% improvement in test execution efficiency** and effective defect resolution, which reduced release cycle time and improved team collaboration.

Bebo Technologies (Junior QA) 5F-OTR

Feb 2022 – March 2023

- **Led testing efforts for a logistics domain project** focused on a **web and mobile-based application** for **trucking companies and drivers**. The platform enables **shippers** to efficiently assign **freight/loads** to drivers via a **customer portal**, resulting in a **25% improvement in operational efficiency** and a significant reduction in manual intervention.
- **Created and executed automation scripts** while performing **manual testing** for both **web and mobile (iOS & Android) applications**, ensuring **consistent user experiences** across all devices, ultimately improving application stability and speeding up release cycles.
- Gained hands-on experience running a wide range of tests, including **Unit, Functional, Regression, Integration, System, Smoke, Localization, API, Interruption, Load, Database, and OS testing**, ensuring **100% test coverage** and delivering **high-quality releases** with minimal defects.
- **Proficient in using industry-standard tools** like **Jira, Testrail, and Eclipse** to manage projects, track test cases, and streamline test execution, contributing to **improved team collaboration** and **more efficient defect resolution**.
